

ARB
CLASSIC
CANOPIES

4X4 ACCESSORIES

Tried and tested in some of the world's harshest environments, the ARB Classic canopy provides secure storage space for a wide range of dual cab, single cab and extra cab vehicles.

CLASSIC

Assembly & distribution

ARB canopies incorporate quality materials and are assembled to the highest standards.

ARB products are sold and serviced via an extensive network of authorised distributors throughout Europe and to more than 100 countries worldwide.

With ARB, you can be assured you are getting quality products, reliable service and after sale support.

ARB canopies are manufactured and assembled to extremely high standards ensuring optimum fitment, strength and reliability. Our canopies are supported by a comprehensive 3 year warranty and spare parts are readily available in case of accidental damage.

Our canopies are stored and assembled at ARB Europe's main warehouse in Prague, Czech Republic.

1 Customised window configuration

The popular lift up windows feature gas struts for self supported window opening, external locking with two unique D handles, keyed alike access with the rear door and an inbuilt rain gutter system to prevent water ingress.

Alternatively, you can select the sliding window option with four lockable positions or a combination of both sliding and lift up windows to suit your needs.

Front windows are available in either a sliding or lift up design. Aimed at improving visibility, the lift up window allows for easy cleaning of the rear window on the vehicle cab.

2 Premium design

Designed and engineered in Australia, ARB canopies incorporate quality materials and are assembled to the highest standards. Our canopies are made from strong recyclable ABS shell material.

The Classic canopy utilises an exclusive sandwich-base plate mounting system, with each canopy affixed to the vehicle via a strong and sturdy steel mount and alloy bed rail process which adds to the body hugging fit and makes for excellent sealing. ARB Classic canopies are available in a smooth or textured finish for most vehicle models.

3 Weatherproof design

The Classic canopy exterior boasts a premium weatherproof design with a UV rated finish to suit harsh environments. In addition, our high quality automotive paint provides a tough, durable and UV resistant finish to complement your vehicle.

4 Durable mounting system

With durability and safety in mind, all Classic canopies are attached with a full length mounting system that firmly secures the canopy to your vehicle. The Classic canopy is rated to carry 100kg with an approved ARB roof rack/bar system.

CANOPY

5 Lighting system

The rear LED brake light is high mounted for safety, while the interior contains an easy to reach halogen light, making it easier to locate work tools and other gear in dark conditions.

6 Premium tint

ARB canopy side windows and doors are manufactured with factory tinted 4mm thick tempered safety glass to keep your canopy area cooler in summer and improve security.

7 Easy clean interior

The Classic canopy uses smooth, inert materials that are easy to clean, ensuring your interior remains odourless.

8 Secure locking system

With security being a key feature, the Classic canopy has double locking handles on both the lift up doors and windows as well as twin catches that are located inside the canopy to keep the tub area secure.

A lockable sliding front window can be optioned for most vehicle models and allows for greater ventilation.

9 Customised roof style

The standard roof canopy is available for a wide range of dual cab vehicles and is designed to blend with the natural height of the vehicle cab. It can be further customised with an ARB trade style roof rack or roof bars. The high roof canopy, which maximises the internal storage area for larger cargo, is available for the majority of dual cab vehicles, as well as a range of single cab and extra cab models.

The unique mid-roof canopy is available for current vehicles such as the Mitsubishi Triton and Volkswagen Amarok to further improve their practicality and styling.

Smooth

The canopy pictured here has a smooth exterior finish, with the option to colour code.

ARB's Classic canopies are available in either a smooth or textured finish, depending on the vehicle model.

Textured

Textured exterior canopies are also available, with colour coding as an option.

Customise Your Canopy

As well as making your pickup a more practical vehicle, there are many options to tailor an ARB canopy to suit your individual needs. From customised window configurations to roof bars, you can choose what options best suit your lifestyle.

Front windows

Front windows are available in either lift up or sliding designs and are manufactured from clear safety glass. Aimed at improving visibility, the lift up window design allows for easy cleaning.

Sliding windows

Sliding side windows are manufactured with tempered and tinted safety glass. Flyscreens can be fitted to these for increased practicality.

Lift up glass windows

Lift up glass side windows allow easy access from the side of your utility. This option is available on one or both sides of your vehicle. Lift up windows are externally lockable with keyed alike access to the rear door.

Lift up aluminium windows

Lift up aluminium side windows allow easy access from the side of your utility. This option is available on one or both sides of your vehicle. Aluminium windows available in the lift up configuration only.

Slab sided

Popular with commercial users, slab sided canopies are available to suit a variety of vehicles.

Vent

The innovative slimline, high flow canopy vent is the ideal solution to reduce dust ingress and improve airflow.

Security mesh

Laser cut from solid steel sheet and powder coated, security mesh is available for all sliding windows for extra security.

Roof racks and roof bars

ARB's range of roof racks and roof bars offer versatility when carrying heavy, large items that are difficult to fit in the cabin of your vehicle.
